

Cast and Parents,

Let's just tell it how it is, medications brought to Cumberland Gang Show should not be placed nor kept in your personal bags. They pose a health/safety threat should another cast member find and ingest.

So let's make it easy, if you have to bring medications to rehearsals or performances, please just cut along the dotted line and fill out the details and place the cut off with your medication in a zip lock bag and return to the First Aid Team. These can include S2 medications i.e. Paracetamols and Ibuprofen for either short or long term use.

All cast should be able to perform in safety and to the best of their ability, we know that sometimes injuries will occur, these will be treated with the best outcome for the cast member in mind by the First Aid Team.

Yours

FIRST AID TEAM.

Please cut on the line and place in a zip lock bag with your child's medication.
